OBJECTIVE

Full-Stack Developer with expertise in PHP (Laravel, Zend Framework), JavaScript (React.js, Next.js), and database optimization. Passionate about delivering scalable and high-performance web applications. Looking to join a dynamic team where I can contribute to innovative software development and grow professionally.

EXPERIENCE

<div>December 2022 - Current</div>	<div>Full-Stack Developer Echoit Solutions Pvt. Ltd.</div> <div>Led development of high-profile projects such as ImpactX, Global Climate Registry, and Craftslane using Laravel, Zend Framework, React.js, and MySQL/PostgreSQL.</div> <div>Implemented client-specific features, optimized API performance, and improved backend efficiency with Redis caching and query optimizations.</div> <div>Collaborated with stakeholders for timely delivery, conducted thorough testing, and mentored junior developers to ensure high code quality and team growth.</div> <div>Integrated WebSockets and real-time notifications for enhanced user engagement.</div>
--	---

EDUCATION

<div>2023</div>	<div>B.Tech in Computer Science Abdul Kalam Technical University</div>
-----------------	---

LANGUAGES

PHP, JavaScript (ES6+), HTML, CSS, SQL

FRAMEWORKS/CMS

Laravel, Zend, MetaFox, Strapi, React.js, Next.js, WordPress, Shopify

TOOLS

Git, GitHub, Trello, Postman

DATABASES & CACHING

MySQL, PostgreSQL, Redis

OTHERS

REST APIs, WebSockets, Tailwind CSS, Bootstrap

PROJECTS

AkashX – Next.js
Worked as a Full Stack Developer on AkashX, a modern web application built with Next.js and Strapi. Contributed to both frontend and backend development, including dynamic content rendering, API integration, and CMS customization. Focused on performance optimization, SEO, and user experience.
Tech Stack: Next.js, Strapi, JavaScript, REST APIs, CSS/SCSS

Project: <https://akashx.ai/home>

MetaFox (Social Networking Platform)

Contributed to the development and customization of MetaFox, a social networking platform built using PHP and Laravel. Implemented new modules, API integrations, and performance optimizations to enhance user engagement and scalability. Developed custom plugins and UI enhancements for better user experience.
Tech Stack: Laravel, MetaFox, ReactJS , JavaScript

Project link: <https://foxapp.echoit.in>

Schemeasy – Android App

React Native | Next.js (Supabase Backend)

Developed a cross-platform mobile application using React Native for a seamless Android experience. Transitioned the backend to Next.js with Supabase for scalable and real-time data management. Integrated dynamic APIs, efficient state management, and responsive UI components. Focused on performance optimization and mobile-first design to ensure a smooth and engaging user experience.

Luxury Project's

Worked as a Full Stack Developer, focusing on both frontend and backend development, including API integration, authentication, and database management.
Tech Stack: Laravel, MySQL, REST APIs, HTML, CSS, JavaScript

Project: <https://luxuryprojects.io/>

Global Climate Registry

Developed and maintained ImpactX, a web application using Zend Framework for carbon credits tracking via blockchain technology. Managed frontend and backend development, API design, and performance optimization to ensure seamless user experience.
Tech Stack: PHP, Zend Framework, MySQL, JavaScript

MyCityConnected

MyCityConnected.us is a community-driven platform built using PHP, HTML, CSS, JavaScript, and jQuery, powered by the Social Engine framework. As a Full-Stack Developer on this project, I was responsible for implementing the NMI payment gateway, developing interactive UI components, and integrating map functionalities to enhance user engagement and navigation.

Project: <https://mycityconnected.us/>

Craftslane (OpenCart)

Craftslane is a feature-rich e-commerce platform developed using PHP, HTML, CSS, JavaScript, jQuery, and OpenCart. As a Full-Stack Developer, I contributed to both frontend and backend development, working on custom functionality, UI enhancements, and overall site performance to deliver a seamless shopping experience.

Project: <https://www.craftslane.com/>

GiftBlooms (OpenCart)

GiftBlooms is an online gifting platform developed using PHP, HTML, CSS, JavaScript, jQuery, and OpenCart. As a Full-Stack Developer, I worked on building and customizing core features, improving frontend user experience, and ensuring smooth backend operations to support global gift delivery services.

Project: <https://www.giftblooms.com/>

TonyDolci (CodeIgniter framework)

TonyDolci is an online bakery and delivery platform built using PHP, HTML, CSS, JavaScript, jQuery, and the CodeIgniter framework. As a Full-Stack Developer, I was involved in developing both frontend and backend features, including product management, user authentication, and order processing to ensure a smooth and user-friendly shopping and delivery experience.
